

DETAILS

DATES	Wednesday 8 May 2019 & Wednesday 3 July 2019	TIME	9.00am – 4.00pm
VENUE	Redlands Research Station, Delancey Street, Cleveland QLD 4163		
LEVEL	Intermediate		

Nursery & Garden Industry
Queensland

Queensland Government sponsored 'Farm Water Futures'

Waterwork Workshop

Like to know more about irrigation and drainage in nursery production?

Then attend the 'Waterwork Workshop' at Redlands Research Station presented over two days in May and July 2019. The workshop will provide an insight into designing and/or improving nursery irrigation and drainage systems to industry Best Management Practice.

This Nursery Production Farm Management System (NPFMS) workshop contains both theory and practical sessions spread over **two days**. The first day covers the theory behind Best Management Practice nursery irrigation and how to evaluate irrigation system performance. After the first day attendees evaluate their own systems, with the results being discussed on day two of the workshop, along with further information on irrigation and drainage design.

The workshop program will be presented by experienced NGIQ Farm Management Systems Officer Lex McMullin and NGIQ CEO Ian Atkinson, one of the original authors.

Workshop numbers are limited so pencil these two dates into your diary now and return this registration form to NGIQ to ensure you do not miss out.

What you will learn

- ✓ The theory behind designing and constructing irrigation and drainage systems to industry BMP.
- ✓ How to conduct a 'catch can' irrigation assessment.
- ✓ An insight into the performance of your own irrigation and drainage system from your own testing.

A range of printed materials, electronic resources and a pressure gauge will be provided to assist you in designing, constructing and maintaining irrigation and drainage systems.

Normally this workshop would cost around \$600 per person. It is however heavily subsidised by 'Farm Water Futures'.

Return registration form to NGIQ Office via email: events@ngiq.asn.au or fax: 07 3277 7109
